SUMMARY

Full-stack developer and designer who designs in Figma and builds complete web products with HTML, CSS, JavaScript, TypeScript, React, Node.js and Supabase. Computer Science student at Lahore College for Women University, applying for remote Frontend / Web Developer roles.

PROJECTS

RishtaElite — *matrimonial platform (showcase project)*

- Built with vanilla JavaScript and Supabase: registration and login with two-factor authentication.
- Real-time messaging between members, English/Urdu language toggle and light/dark theme.
- Profile photo upload and a fully functional admin panel.

Problem solved: Lets people in Pakistan search for marriage matches and message each other privately, in English or Urdu, behind 2FA-protected accounts.

THREAD CO. — *multi-page e-commerce store*

- Built with HTML, CSS and vanilla JavaScript, with two-factor authentication via EmailJS.
- Working shopping cart and checkout flow.

Problem solved: Lets customers browse products, fill a cart and complete an order online without visiting a store.

AI Image Captioner — *built with AI assistance*

- React (Vite) front end that sends uploaded images to the Gemini API and displays the generated caption.

Problem solved: Saves the time of writing captions by hand by generating one from an uploaded image.
